- Intuitive Help speaks every button's function
- Save files to hard drive or USB thumb drive
- Includes classic literature starter library of 222 titles
- Support for Braille displays

Fast Reading with Intuitive Controls

SARA CE is an easy-to-use reading solution for those that are low vision, blind, or deaf-blind. Color-coded, tactile controls that speak their functions enable you to get started quickly reading books, magazines, mail, and more – with no prior experience.

Automatic Page Capture

In automatic mode, SARA CE senses motion and knows to snap an image whenever you turn a page. It can snap two paperback pages at a time and adjust to accommodate sideways and upside-down text. You can simply keep turning pages and keep capturing images while the SARA CE reads continuously. You can save your materials to the 160GB hard drive or to USB - or simply enjoy the library of 222 classic books already installed.

Customizable Voices and Languages

Choose from a variety of natural-sounding male and female voices and adjust speech rate and volume on the fly as you read. Slow it down or read word by word to confirm the details – even have a word spelled out – or speed ahead to skim a document – you're in full control. SARA CE comes with sixteen languages installed, so you can scan documents that are in different languages and read them with native speaking voices.

SARA™ CE

Scanning and Reading Appliance

Low Vision Features

SARA CE can also be connected to a computer monitor to add colorful, large print access to your materials as they're read back to you. You can adjust the font style, color, size, and spacing and have the words highlighted as they are read.

Read Audio Books

SARA CE reads and plays files in many formats including blind-accessible DAISY books, books on CD, and other popular audio file types from CD or USB sources.

Large color-coded keys with raised markings make operation simple
